Voice of Volunteer

Akira Masuda
(Saitama)

Today we want for picking up SAMMA but due to the windy condition it was soon canceled. So far as I heard of, the amount of fish scattered from the factory is around 2000 tons. It shall be quite long term but I wish this action to be continued spontaneously even after GW because without volunteers it's not likely to be accomplished. I'm so happy because every volunteer is so conscious that kaizen is done day by day.

We Welcome Support Staff!

We want backyard staff among volunteers who supports many volunteers working in frontline.

Let's keep this facility clean.

- ① please hold your garbage with you and bring it to your home.
- ② please distinguish your garbage see the guidance on garbage box.
- ③ clean up around you when you notice.

We've got rental bikes

10 bicycles presented by Tono city.
